

The versatile Goods Lift Range will integrate perfectly into all types of buildings and is an ideal solution where a mezzanine floor must be added. The unit is supplied completely self-contained within its own modular shaft structure and there is no need for a separate machine room. The lift can be installed with the minimum amount of builders work, making the Goods Lift Range a cost effective method for goods transportation.

The lift does not require a pit and is provided with a low incline ramp for entry and exit. However, the lift can be installed within a shallow pit, if site conditions permit.

## OPTIONAL EXTRAS

In addition to the standard lift sizes listed, lifts with cabin dimensions specific to individual applications are available, making the Goods Lift Range adaptable for installation in non-standard environments.

For example, the lift can be adapted to meet explosion proof legislation or can be manufactured to be used in cold store applications.

## PRODUCT FEATURES

- ➔ Unique free-standing shaft
- ➔ No pit required
- ➔ Maximum load capacity 2000 kg
- ➔ Travel up to 18 metres
- ➔ Serves up to 2-6 floors
- ➔ Operational speed 0.2 m/s
- ➔ No separate machine room
- ➔ Modular design
- ➔ Special cabin sizes available
- ➔ Can be relocated

# Goods Lift Range
