Excellent solution
The Inclined Platform Lift is a unique product which offers an excellent solution for straight or curved stairways and satisfies the most demanding safety requirements, making it perfect for installations in public buildings or at home.

Thanks to its compact design, the lift uses minimum space on the stairway – only 300 mm when folded in the parked position. The lift uses an aluminium rail system, which can be relocated elsewhere with relative ease. The Inclined Platform Lift can be used for internal and external stairways even in extreme weather conditions.

The Inclined Platform Lift is fully automatic as standard and can be tailored to meet your specific needs. Operation is safe and easy, requiring no special training.

Optional platform sizes available (if staircase dimensions allow)
- Folding seat for pedestrian users
- 90 degree access to platform
- Special RAL colour
- Stanchion mounted rail
- Special platform sizes available

Incline Platform Lift

PERFECT SOLUTION
